

Poster Numbers		<p style="text-align: center;">Fragility Fracture Network Congress 20 - 22 October 2022 Melbourne Convention Exhibition Center</p>	
	THURSDAY 20 - SATURDAY 22 OCTOBER 2022		
Multidisciplinary Acute Care			
1	27 : Frailty Affects Outcomes of Hip Fracture Patients with Type 2 Diabetes - Beatrix Wong		
2	72 : The effect of CKD on intertrochanteric fracture treated with proximal femoral nail anti-rotation: a 7-year study - Ong-art Phruetthiphat		
3	94 : Describing the Care Conundrum that Exists Among Older Adult Patients that Experience Low-Energy Pelvic Ring Fractures - Fernando Huyke-Hernandez		
4	98 : Identifying Deficiencies in the Hip Fracture Care of Parkinson Disease Patients: A Descriptive Comparison to Non-Parkinson Patients - Fernando Huyke-Hernandez		
5	102 : Is it possible to improve care and maintain improvements under a pandemic? Experience from a newly established orthogeriatric unit. - Sameer Maini		
6	114 : Clinical and Functional Outcomes following Revision Fixation with Cement Augmentation after Failed Primary Fixation of Intertrochanteric Fractures - Fernando Huyke-Hernandez		
7	141 : Efficacy of multidisciplinary pathway in the joint care model between geriatricians and Orthopaedic surgeons: A prospective study of a cohort of elderly patients with hip fractures - Sherif Zidan		
8	142 : Piloted orthogeriatric service reduces hip fracture mortality and the occurrence of the second fracture. Alnoor Specialist hospital Makkah Saudi Arabia - Sherif Zidan		
Rehabilitation			
9	18 : The effects of pre-fracture frailty and other patient factors on hip fracture rehabilitation outcomes - Jonathan Kok		
10	101 : Our hospital's efforts to extend healthy life expectancy in the community - Shunya Inaba		
11	144 : Free testosterone and Cr/Cys C ratio as biomarkers for falls and fragility fracture - Ga Yang Shim		
Secondary Prevention			
12	24 : A new hospital-based protocol for pre-discharge bone-protective pharmacotherapy in patients admitted for hip fracture - Markus Seibel		
13	104 : An Audit of Discharge Summary Quality And Introduction of Discharge Summary Template in an Orthogeriatrics Service - Fergal Fouhy		
14	120 : Evidence of Underreporting and Misrecognition of Delirium in Hip Fracture Patients: An Opportunity to Improve Quality of Care - Fernando Huyke-Hernandez		
15	121 : Structured patient assessment chart can improve our identification of patients at risk having a vertebral fracture - Ane Djuv		
16	140 : Bridging the Gap: Bone Health Education for Specialists - Paul Mitchell		
17	143 : A 3-year Outcomes of An Fracture Liaison Service Model in a University-Based Tertiary Care Hospital in Thailand - Pojchong Chotiyarnwong		
18	150 : Denosumab prescribing and rates of hypocalcaemia in hip fracture patients with renal impairment - Melissa Teo		
19	125: Predicting Bone Mineral Density T-scores using Machine Learning for assessing Clinical Risk Factors for Osteoporosis patients - Ravi Jain		
20	126: Evaluation of ML classifiers for Risk Fracture Prediction using FRAX without T-Scores - Ravi Jain
